

## **ALN Kenya Congratulates Globeleq on their Appointment of Toyota Tsusho as the EPC Contractor for the Menengai Geothermal Power Project**

ALN Kenya is delighted with the achievement of this critical milestone for the Menengai project. This follows the achievement of another critical milestone in December last year with the conclusion of finance agreements between the Project Company and the African Development Bank, the Eastern and Southern African Trade & Development Bank and the Finnish fund for Industrial Cooperation. ALN Kenyan has proudly represented the Project Company for many years as sole counsel on this unique project (including in relation to the finance mentioned above, construction and service agreements) and looks forward to the achievement of an even more critical milestone in the coming months – financial close!
